

THILAKKUMAR SANDAMDEVAN

EXECUTIVE SUMMARY

Enterprise Cloud Data Architect with 15+ years of experience driving data strategy, solution architecture, and modern data platform transformation across Telecom, Finance and Healthcare domains. Proven expertise in designing and implementing cloud-native data platforms (AWS/Azure), Data architecture and scalable analytics ecosystems leveraging Snowflake, Databricks, PySpark, Data Lake, Lake House, Delta Lake and AI/ML capabilities. Strong track record of leading end-to-end architecture design, engagements and large-scale data transformation programs, aligning business strategy with high-performance data solutions. Adept at translating complex business requirements into scalable, governed, and future-ready data platforms that enable advanced analytics and intelligent decision-making.

CORE COMPETENCIES

- Enterprise Data Architecture & Solution Design
- Modern Data Platforms (Databricks, Data Lake, Snowflake, Lakehouse)
- Cloud Architecture (AWS, Azure)
- Data Strategy & Governance (Data Mesh, Data Products)
- AI/ML & Advanced Analytics Enablement
- Data Engineering Frameworks & Reusable Assets
- Presales, Solution Consulting & PoC Delivery
- Stakeholder Engagement & Executive Communication
- Migrating from on-premises to cloud solutions (Spark, Hadoop to Databricks).
- Telecomm, Insurance (P&C) & Healthcare Data Domains
- Agile Delivery & Large Program Leadership

EXPERIENCE SUMMARY

Data Architecture Leader

InComm Payments

Jan 2023 - Current

- Defined and executed enterprise data strategy and architecture roadmap aligned with business transformation initiatives.
- Designed and implemented scalable data architecture and data products using Databricks and PySpark, improving analytics efficiency by 30%.
- Architected cloud-native data platforms leveraging AWS, Snowflake, and modern lakehouse principles, integrating Databricks Lakehouse for unified data engineering and analytics workloads.
- Built and optimized large-scale data pipelines using PySpark on Databricks, enabling high-performance batch and streaming data processing.
- Led end-to-end migration from Oracle (SQL/PLSQL, ODI, GoldenGate) to Databricks, including schema translation, ETL/ELT modernization, and code conversion using PySpark and Spark SQL.
- Led development of predictive analytics and AI/ML-driven models for underwriting and risk analysis using scalable Spark-based frameworks.
- Established data governance frameworks, ensuring regulatory compliance, data quality, and security standards across distributed data platforms.
- Developed reusable data engineering patterns and frameworks (Delta Lake, ETL pipelines, workflow orchestration) to accelerate delivery across multiple programs.
- Partnered with business stakeholders (underwriting, claims, actuarial teams) to translate requirements into scalable architecture solutions.
- Led architecture reviews, executive presentations, and strategic planning sessions.
- CI/CD, automation, and platform standardization across engineering teams, including Databricks job orchestration and deployment pipelines.

CONTACT DETAILS

Address: Cumming, GA, USA

SKILLS

- Data Analytics and Strategy
- Azure Databricks
- PySpark
- Data Lake, Lake House
- Data Analysis and profiling
- Requirements gathering
- SQL proficiency
- Data Governance
- Cloud Computing (AWS, Azure, Snowflake)
- AWS Aurora and Redshift DBs
- Product Management
- Stakeholder Collaboration
- IT service management expertise
- Capacity & Budget Planning
- Leadership and
- Team Management
- Service Delivery Optimization
- Adaptability & Flexibility
- Agile Process and Methodologies

EDUCATION

- **Master of Technology** 05/2004
VIT University, Vellore, India
- **Bachelor of Engineering** 05/2001
University of Madras (India)

Software Engineering Manager

Accenture Plc | Client: AT&T

Apr 2015 – Jan 2023

- Designed enterprise data integration architecture supporting large-scale healthcare data platforms.
- Built data distribution and analytics frameworks for real-time and batch processing.
- Created end-to-end data models, source-to-target mappings, and architecture blueprints.
- Collaborated with enterprise architects to ensure alignment with enterprise data strategy and governance standards.
- Led cross-functional teams to deliver high-performance, scalable data pipelines in AWS.
- Developed data quality frameworks and compliance-driven data processing systems.
- Produced architecture diagrams (logical, physical, data flow) for cloud and hybrid environments.

Data Integration Engineer/Data Management Lead

Accenture India, Pvt| Client: Telstra

Nov 2009 – Apr 2015

Enterprise Data Platform & Oracle Architecture

- Architected and managed Oracle EBS R12 platforms (10g–11g) across 13+ environments, ensuring scalability and performance.
- Designed data lifecycle and governance solutions including secure data masking, refresh, and access controls.
- Built high-availability architectures using RAC, ASM, and Data Guard with strong DR capabilities.
- Led environment provisioning and deployment frameworks (Rapid Clone, AutoConfig, CI/CD-style releases).
- Executed database modernization and migration initiatives (9i → 11g, Siebel upgrades).
- Implemented automation, monitoring, and recovery strategies (RMAN, scripting) to improve reliability.
- Directed offshore team and collaborated with stakeholders to deliver scalable, business-aligned data solutions.

PRIOR EXPERIENCE

- Worked for Client/Company
 - Oracle India (P) Ltd / Genisys Software from May 2009 - Nov 2009
- Worked for Client/Company
 - Telcordia Technologies (Accenture India Pvt Ltd) / Abletek from July 2008 - April 2009
- Worked for Client/Company
 - Pivotix Inc, IL / Yantro software Pvt Ltd from July 2004 to June 2008

CERTIFICATIONS

- Data Architect Associate Certification(Accenture)
- Business 360 : Master Data Management(Accenture)
- AZ-900: Microsoft Azure Fundamentals
- AZ-104: Microsoft Azure Administrator
- Amazon AWS Certified Solutions Architect – Associate
- Oracle Certified Professional (OCP) in 12c.

VISA STATUS

H1B - I140 Approved
