PROFESSIONAL SUMMARY

Software Engineer with 6+ years of experience in building scalable backend systems using Java and Spring Boot. Strong foundation in data structures, algorithms, and object-oriented design, with hands-on experience in debugging, performance optimization, and large-scale distributed systems. Proven ability to improve system performance, resolve production issues, and contribute to reliable, high-quality software in Agile environments.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript

Core Concepts: Data Structures & Algorithms, OOP, Design Patterns

Backend: Spring Boot, REST APIs, Microservices

Databases: PostgreSQL, MySQL, MongoDB

Tools: Git, Jenkins, JIRA, Maven, Docker

Systems: Linux/Unix, Distributed Systems, CI/CD

Other: Debugging, Performance Optimization, Code Reviews, Unit Testing (JUnit)

PROFESSIONAL EXPERIENCE

Software Engineer – Verizon (Remote)

Aug 2025 – Present

- Developed scalable backend services using Java and Spring Boot, supporting high-volume distributed systems.
 - Designed and optimized REST APIs, improving response time by 25% through efficient data structures and query tuning.
 - Applied data structures and algorithms to solve performance bottlenecks and improve system efficiency.
 - Diagnosed and resolved production issues, performing root cause analysis to enhance system reliability.
 - Contributed to code reviews, testing, and system health improvements, ensuring maintainable and high-quality code.
-

Software Engineer – Dell Technologies

June 2021 – July 2023

- Built backend services using Java, Spring Boot, and REST APIs for enterprise applications.
 - Designed solutions using efficient algorithms and data structures for scalable data processing.
 - Debugged and resolved complex system issues, improving application stability.
 - Optimized SQL queries and backend logic, improving performance by 25%.
 - Contributed to testing, code quality, and continuous system improvements in Agile teams.
-

Java Developer – Cognizant Technology Solutions

March 2019 – June 2021

- Developed applications using Java, Spring Boot, and microservices architecture.
 - Implemented backend logic using OOP principles and data structures for scalable design.
 - Assisted in debugging, testing, and performance optimization of applications.
 - Participated in code reviews and software testing, ensuring reliability.
-

Java Developer – ValueLabs

June 2018 – March 2019

- Developed backend components using Core Java and REST APIs for enterprise applications.
- Applied basic data structures and algorithms to implement efficient business logic.
- Assisted in debugging and resolving application issues, improving system stability.
- Supported unit testing and code reviews, ensuring code quality and adherence to standards.

PROJECT HIGHLIGHTS

- Improved API performance by 25% through algorithm optimization and query tuning.
- Built distributed microservices handling large-scale data processing.
- Enhanced system reliability by resolving production issues and improving system health monitoring.

EDUCATION

Master's in computer Information Systems – Saint Louis University (2025)

Bachelor's in ECE – TKR College (2018)
